

David T. Fung

**Chairman and CEO, ACDEG International Inc.
National Board of Directors,
Canadian Manufacturers & Exporters (CME)**

Dr. David Fung is a global technology integrator with business partnerships in North America, Europe and Asia. His operating experience includes: the world's largest distributor of merchant sulphuric acid, research manager of one of the largest chemical companies in Canada, president of a global engineering and proprietary equipment company with five divisions on four continents and chemical plant projects on six continents. He is part owner and operator of one of the largest propane distributors in British Columbia and led a joint venture with Ekman AB of Sweden, one of the largest pulp and paper traders in the world.

Fung was incremental in the development and execution of a Shanghai-based Sino-Canadian waste-gas-fuelled power plant joint venture — one of the most successful Canadian-initiated investments in China, and was a strategic advisor at Cycle Capital Management Inc., the largest CleanTech venture fund in Canada.

In addition to CME, Fung sits on the following boards:

- Canada Foundation for Innovation (CFI)
- Canada-China Business Council
- Chemical Institute of Canada
- Canadian Standards Association Group
- Canadian Green Chemistry & Engineering Network
- International Science and Technology Partnership Canada
- CentrePort Canada Inc.

Fung has a B.Eng., M. Eng., Ph.D. in chemical engineering from McGill University, is a P. Eng. in the province of British Columbia and is Audit Committee Certified (A.C.C.). He has been awarded Canadian Asian of the Year (Business and Public Service) in 2009 by Asia Network Canada and the Queen Elizabeth II Diamond Jubilee Medal in 2012 by Governor General of Canada.
