

Daniel Péloquin

President, Schneider Electric Canada

**National Board of Directors,
Canadian Manufacturers & Exporters (CME)**

Daniel Péloquin obtained a Bachelor of Engineering from École Polytechnique de Montréal in electrical engineering, with a major in power systems, in 1981. He has been a member in good standing of the Ordre des Ingénieurs du Québec since his graduation.

Péloquin has been involved in the manufacturing and exporting of products and services serving the electricity industry on international markets for more than 30 years. His background includes extensive executive leadership in general management, engineering, sales, marketing and operations. Péloquin has a wealth of experience in leading and managing large teams of people for many large, global organizations in Canada and the US.

Péloquin holds various positions on the boards of directors of several advocacy groups, in addition to CME: Association de l'Industrie Électrique du Québec (AIEQ), Cigré Canada, Institut en Génie de l'Énergie Électrique (IGEE).

Like all of us, he has seen the downsizing of the Canadian manufacturing industry and wants to make a contribution to help Canadian manufacturers take the appropriate steps to become and/or remain competitive on the international scene. He also has a passion for developing the next generation of technical talents and leaders.

When he is not busy at work, Péloquin is an avid scuba diver and a remarkably average hockey player. He enjoys traveling abroad with his wife, Sylvie, and reading a good novel at home.
